

Highlights of the Edmonds Beach Class

In the Edmonds Beach class, we begin with our outdoor classroom. During this time we set up the cameras correctly including Aperture Priority, ISO, White Balance, Advanced Color Settings and More. Then we go through all the professional shooting techniques including Depth of Field, Exposure Compensation, Circular Polarizer, Split Neutral Density Filters and More.

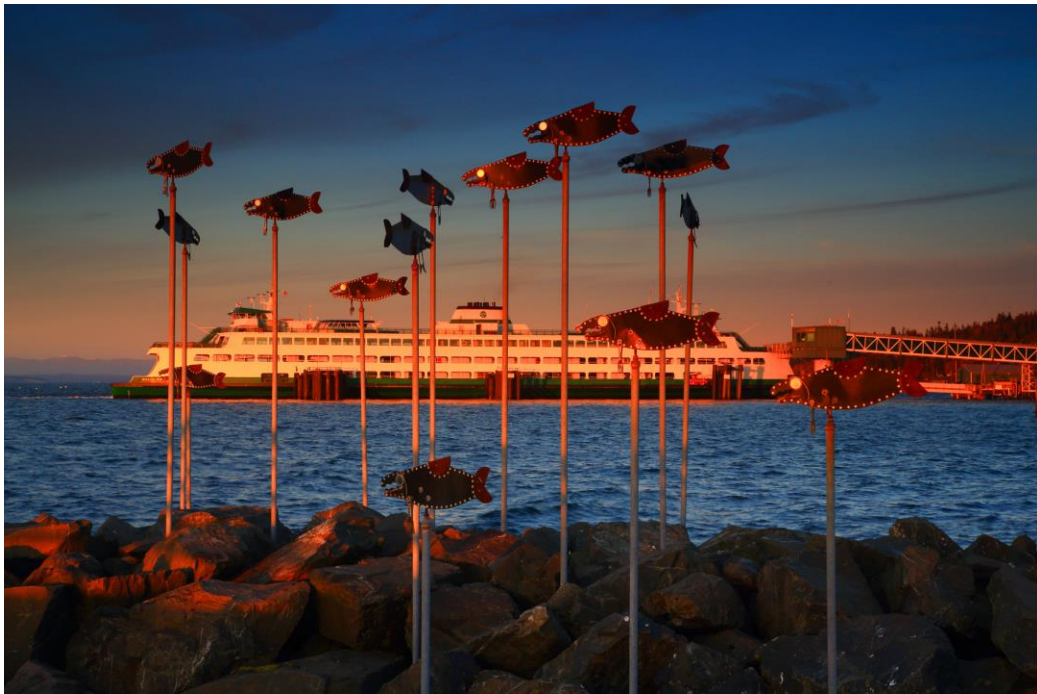

We do this one step at a time, slowly, so every student understands each step. This is a great beginner's class and you need not know anything or study anything to take this class. Here are some of the image highlights:

Sunset Edmonds Beach

Sunset Edmonds Beach with Ferry at Dock

Sunset Edmonds Fish and Ferry

And the Big Finish after sunset with the Ferry at Dock

You will love the Edmonds Beach Class!
